

At KNIPEX, we take great pride in offering a diverse range of high-quality pliers, and we're excited to be in the process of transitioning many of our models to feature our new, innovative comfort handle design. This transition is a gradual one, and we currently do not have specific availability dates for when the models not yet listed will be updated with the new handles. To stay informed about the latest updates and announcements, we encourage you to regularly check www.knipex-tools.com/knipextend for updates. We appreciate your enthusiasm and patience as we work to enhance your experience with our tools!

TOOL TETHERING SYSTEM

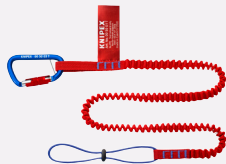

PEACE OF MIND WHEN ON THE JOB

The KNIPEX Tool Tethering System offers multiple ways to connect a KNIPEXTEND ready tool, with a TetheredTool clip, to your wrist, belt, harness or tethered tool bag to provide effective protection against accidents caused by falling tools. The ANSI compliant system contains carabiners with captive eye and self-locking gate, lanyards and short adapters. The lanyard is made of gathered fabric that expands to approximately 5' when under strain. The adapter straps can be attached directly by the cord to the wrist, belt or climbing equipment. NOT FOR HUMAN SUPPORT.

KNIPEX Tool Tethering System

ANSI/ISEA 121-2018 Compliant

Product Number	Description
